SAS Webinar: Mastering Interview Skills

The SAS Development Programme are pleased to announce an upcoming educational event on interview skills, to be delivered by Trevor Bibic, Medical Careers Consultant.

From feedback gathered from SAS grades across Scotland, we understand that many of you are intending to progress to Specialist or Consultant-grade posts in the long term. In order to help SAS grades maximise their potential for career development, we're delighted to offer this half-day online session on how to prepare for a job interview, covering areas including:

- How to understand what qualities a potential employer is looking for in a candidate
- Identifying your own professional strengths, interests, and approach to leadership
- Effectively communicating your relevant skills and experience
- Tips and tactics for the day of the interview

This will be an interactive session, with practical activities designed to build your confidence and insight. Additionally, you will have the chance to take part in exercises from both the interviewer and interviewee perspective, helping you get the most from the experience.

Please contact SASDevelopment@nes.scot.nhs.uk for any queries
